

QLD FUTURE  
SUMMIT AUGUST 24  
TWENTY 16

SUMMARY REPORT

## OVERVIEW

The QLD Futures Summit 2016 discussed issues from four dominant areas of importance for Queensland:

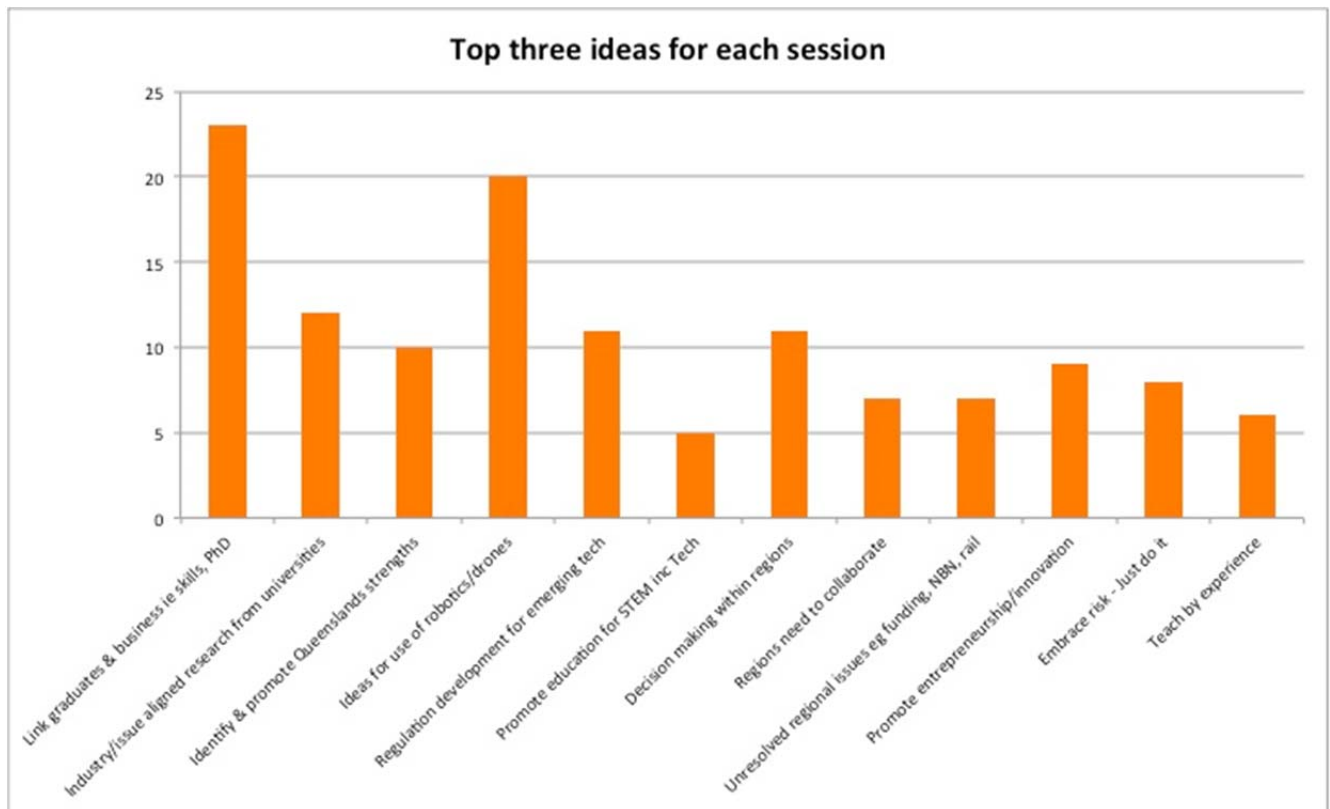

- **Positioning Queensland as a Research and Education Powerhouse;**
- **Robotic Revolution;**
- **Growing Regional Queensland; and**
- **Secrets of Innovation Success;**

The salient theme from the day was the need to work together to develop areas of innovation and entrepreneurship thereby promoting a sustainable Queensland economy. The Summit panellists emphasised: the need for greater alignment between industry and societal issues and the research and education provided by universities; the need for innovation spaces to facilitate the transfer of ideas across disciplines; the potential opportunities for the state from the robotic revolution; and, the challenges to creating vibrant thriving regional areas.

Specific discussions explored the changing educational demands of preparing students for a career in a rapidly changing market environment; the development of robotics through bio-mimicry and the world leading innovation in robotics delivered from Queensland; the challenges experienced by regional centres in developing industries and jobs; and, moves within Queensland to facilitate innovation including the announcement of Mark Sowerby as Queensland's first Chief Entrepreneur.
